Bacterial Control Systems

High Tech Water Line Cleaner

Does not contain Hydrochloric acid, Chlorine or Copper compounds

Easy To Use

Wipe On/ Wipe Off

Powerful

Excellent Value for Money

Concentrated Formulae

Safe for Fibreglass

Fully Biodegradable

Your boat's hull can be permanently spoiled by bad cleaning techniques or by the use of the wrong cleaning agent.

RiverClenz is a fast acting, deep penetrating and easy to use acid based cleaner.

RiverClenz not only removes the brown waterline stain, it also dramatically delays its return.

How do I use RiverClenz?

1. Remove heavy algae with a deck brush or pressure water.
2. Pour RiverClenz into a plastic bucket or onto a soft cloth. You can also use a brush or broom; rub the Riverclenz solution onto the stained areas.
3. Rinse with water and repeat if necessary.

Safety

1. RiverClenz should be handled like any cleaner and steps should be taken to avoid contact with eyes or skin.
2. Be environmentally responsible. Clean your boat on land sufficiently far away from the water's edge so that runoff will not enter the water.
3. RiverClenz is designed specifically for fibreglass surfaces. Other materials should be safe but please test a small area to your satisfaction before proceeding with the cleanup.
